

"Stronger than all the armies in the world, a new idea whose time has come" Victor Hugo

## It's up to us. Let's get involved in spreading the word

(The use of plain yellow paper is recommended)

- To facilitate the distribution of the Peoples' International, you can print the leaflet on pages 3 and 4. Print it recto-verso with the short side facing down, then divide it in two, making two leaflets to distribute at demonstrations. At the top right of the leaflet is a QR Code which takes you to the website where the video is broadcast.
- To publicise the Peoples' International, you can also print self-adhesive labels, the matrix of which is shown on page 2, with the following production instructions.

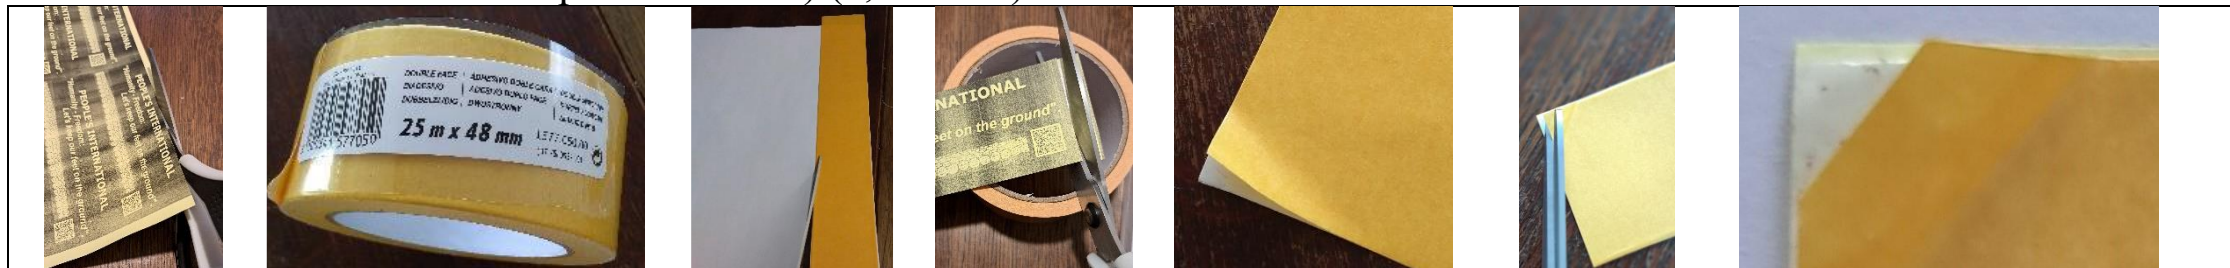

Print page 2 of this file on yellow paper in a reprographics shop. As the quantity of toner required is relatively large, there will be no extra cost - the price is charged by the page.

Next, cut out the yellow border at the top of the sheet (1) and stick a 48mm wide self-adhesive strip along the black border on the reverse (DIY shops charge around 5 euros for 25m) (2).

Carefully cut out this first row of two stickers (3).

Then cut off the two ends and separate each sticker by cutting down the middle, and repeat the operation (4).

A word of advice: for each label, pre-cut the sticker on one corner. This tedious work is necessary to make it easier to stick when you're near a well-placed, clearly visible support. (This avoids having to spend a minute trying to separate the face of the sticker from the label in front of a well-placed surface) (5, 6 and 7) NOT LETTING GO!

# PEOPLE'S INTERNATIONAL

« Humanity – Freedom : Let'keep our feet on the ground »

The Peoples' International has a single objective: to deconstruct the corrupt globalised oligarchic system that dominates the world.

Comprising founding members from Germany, Belgium, the Netherlands and France, Peoples' International's motto is "Humanity - Freedom: Let's keep our feet on the ground".

The action of this International is to inform and mobilise citizens of every country in the world so that they organise themselves to limit the transmission of capital between generations for the richest people.

## Quite simply, a revolution.

This universal requirement is based on data from the World Inequality Report 2022 and on the national accounts of the various Member States.

Distribution of wealth in the United Kingdom

- 21.29% of wealth is held by the richest 1% of the population
- 35.84% of wealth is held by the richest 9%.
- 4.64% of wealth is held by the poorest 50%.

Breakdown of average wealth in the UK

- 1% have an average wealth of : 10,048,027 euros
- 9% have an average wealth of : 1,879,449 euros
- 50% have an average wealth of: 37,757 euros

This crushing of the lowest average wealth is accelerating to the great benefit of the richest 1%.

This is true in every European country and in every country in the world6.

This is why we are proposing to limit the transfer of capital between generations. See our proposals .....PTTP

**How can we limit the transfer of capital between generations?**

**We are the 99% facing the 1%.**

**The corrupt globalised oligarchy that dominates the States for its own profit must disappear.**

**Nothing could be simpler in the United Kingdom, for example:**

1°) Limit the transfer of capital between generations: No citizen may receive more than 55 years' worth of the minimum annual salary, i.e. £1,109,000 in 2023, as a maximum inheritance, gifts and/or legacies.

2°) In compensation, 60% of this maximum amount passed on to each child is exempt from any tax, i.e. in 2023: £665,400. Above this amount, a flat tax of 45% is levied.

3°) Once the maximum amount per child has been reached, employees inherit tax-free social ownership of their company in the form of a cooperative or an employee holding company for large companies or multinationals.

4°) As the donors have passed on the maximum inheritance to their children and the social ownership of their company to their employees, they can do what they like with the rest of their capital, subject to payment of a 70% inheritance tax.

5°) In order to facilitate entrepreneurial freedom, the amount of these taxes will be paid out in the form of a universal capital inheritance of 4% of the maximum inheritance amount, i.e. in 2023: £44,360 to every 25-year-old without any special conditions.

This endowment can be allocated from the age of 18, with administrative support to help set up a professional project.

**The Peoples' International is not a political organisation and will never present candidates in elections.**
